

NORMA ZUHROTUL HAYATI

Semarang, Indonesia | +6288802661893 | normasucid@gmail.com | github.com/NormaAyaa

SUMMARY

Fresh graduate in Informatics Engineering with a strong focus on Artificial Intelligence and intelligent system development. Proficient in Python and modern AI frameworks, with hands-on experience in building and deploying AI-powered applications, including Large Language Model (LLM) integration, NLP-based systems, and deep learning solutions. Experienced in designing end-to-end AI pipelines, developing scalable AI architectures, integrating APIs, and deploying interactive applications for real-world use cases. Demonstrates strong analytical and problem-solving skills with the ability to translate complex AI concepts into production-ready systems that deliver measurable business value.

EDUCATION

Bachelor of Informatics Engineering with Honours 2021 - 2025

Universitas Negeri Semarang

- GPA: 3.65
- Thesis on "Optimization of Credit Card Default Classification Method Based on Artificial Neural Network and Hybrid Explainable AI (XAI)".

Senior High School, Mathematics and Natural Sciences 2018 - 2021

SMAN 7 Semarang

- Final Score: 83.53

INTERSHIP EXPERIENCE

AI Engineer Intern - PT. DataIns, Yogyakarta Aug 2023 - Jan 2024

- Implemented security layers on chatbot application using Python and LangChain framework
- Integrated Large Language Models (OpenAI GPT-3, Hugging Face) to enhance chatbot contextual understanding
- Developed PDF content analysis system with keyword search and information retrieval via API
- Applied NLP techniques to improve document search functionality and analytics
- Built responsive user interface using Streamlit framework
- Prepared technical documentation and conducted training sessions for internal teams

PROJECT & RESEARCH

Undergraduate Thesis – Optimization of Credit Card Default Classification

- Built predictive model using ANN with XGBoost feature selection and SMOTE balancing
- Applied Hyperparameter Tuning (Hyperband) with Adaptive learning rate decay
- Implemented Hybrid Explainable AI (SHAP + LIME) for model interpretability
- Achieved 81.7% accuracy in credit risk prediction

Database System Development (Web-based)

- Designed and implemented comprehensive relational database system using HTML, CSS, and SQL
- Created user-friendly interface with optimized database queries and data management functionality

Statistical Data Analysis Project

- Conducted Exploratory Data Analysis (EDA) and statistical testing using Python
- Utilized Pandas library and Tukey Test for comprehensive data analysis and hypothesis testing

Desktop Application Development

- Built CRUD-based desktop application using Java and NetBeans IDE
- Implemented database integration with optimized GUI design for enhanced user experience

SKILL

- Programming:** Python, Java, C++, SQL, R
- Frameworks & Tools:** LangChain, Streamlit, Hugging Face, Figma, RStudio, Power BI
- Data & ML:** NLP, Machine Learning, Deep Learning, Explainable AI (SHAP, LIME)
- Web Development:** HTML, CSS, Database
- Soft Skills:** Teamwork, Communication, Problem-Solving, Adaptability
- Languages:** Indonesia, English
